U.S. EPA Region 7, RCRA/Iowa
726 Minnesota Ave.
Kansas City, KS 66101

Dear Don:

Thank you for your assistance and the information you have provided to A-TEC and A-TEC customers in the past several months.

A-TEC is formally requesting a thirty (30) day extension for on site accumulation of mercury/phosphor powder at our lamp recycling facility located at 5745 N.E. 17th Street, Des Moines, Iowa 50313. Bethlehem Apparatus Company, Inc. (our source for mercury retorting) is unable to accept any more shipments in the month of January 1995. A-TEC has material stored on site which will reach its 270 day limit on January 7, 1995. Bethlehem Apparatus Company, Inc. has scheduled acceptance of our material between February 6th and February 10th of 1995.

This formal request for a thirty (30) day extension from January 7, 1995 for on site accumulation is based upon 40 CFR 262.34. A-TEC's EPA I.D. Number is IA0000109827.

Thank you in advance for your assistance. Should you have questions or if we may provide additional information, please contact me personally at your convenience.

Sincerely,

Ron Newman
